

CLEARLIGHT® SAUNAS
AUSTRALIA & NEW ZEALAND

BUILT-IN CHARGING AND AUDIO STATION

Charge your tablet or smart-phone inside the sauna and connect your favorite audio device with Bluetooth or the included MP3 jack.

BUILT-IN ERGONOMIC BACKREST

Relax close to the soothing infrared heat against the Chiropractor designed built-in ergonomic backrest.

COMBINATION DOOR HANDLE/TABLET CRADLE FOR EASY MEDIA VIEWING

Place your tablet on the door handle for easy viewing of your favourite shows or movies.

TRUE WAVE™ FULL SPECTRUM HEATERS

Our full spectrum infrared heaters deliver over 20 times the power of the nearest leading competitor. Our patented heating system allows for the deepest penetration with peak performance for the best results.

BUILT FOR THE OUTDOORS

Cedartec® exterior finish for durable outdoor use and Western Red Canadian Cedar interior for that true sauna feel.

THERAPEUTIC FAR INFRARED HEATERS

Our exclusive True Wave™ hybrid Carbon & Ceramic low EMF / low ELF heaters surround you in healing infrared heat.

DOCTOR DESIGNED ERGONOMIC BENCH

Relax in comfort in your sauna with our exclusive recliner or flat bench.

INFRARED HEATED CERAMIC TILED FLOOR

Includes an easy to clean cream ceramic tiled floor – with underfloor True Wave™ Carbon & Ceramic far infrared heaters.

ENHANCED AUDIO SOUND SYSTEM

Bluetooth and AUX inputs make it easy to connect and listen to your audio devices.

DIGITAL KEYPAD CONTROLS

Never Fail™ digital keypad controls temperature, time, lights and reservation mode.

COLOUR LIGHT THERAPY

Your Outdoor sauna comes with medical grade Chromotherapy as standard.

TABLET/ SMARTPHONE CONTROL (optional)

Log in from your tablet or smartphone and remotely operate your sauna.

SPECIFICATIONS

Construction

Cedartec® exterior with Eco Certified Western Red Canadian Cedar interior 8 mm thick tempered safety glass: doors & windows
Weight: 476 kg

Exterior

Width: 210 cm *
Depth: 131 cm *
Height: 203 cm
*Add 21 cm roof overhang

Interior

Width: 195 cm
Depth: 119 cm
Height: 179 cm
Bench: 56 cm x 195 cm

Heaters

True Wave™
Far Infrared and Full Spectrum Infrared Heaters

Electrical

Power: 240V / 3,800W / 17.3A
Power outlet: 20A

Warranty

Residential - Lifetime Warranty
Commercial - 5yr Warranty

CLEARLIGHT® SAUNAS
AUSTRALIA & NEW ZEALAND

Infrared Sauna Safety: Low EMF / Low ELF

As a trusted health and wellness company, your health is our top priority. That is why our True Wave™ infrared heaters are the safest and most effective on the market today. To prove it, Jacuzzi® infrared saunas are designed to be the only ones that cancel both EMF and ELF and have the best testing record in the industry.

What is EMF?

Electromagnetic Fields; EMF and ELF have been called “dirty electricity” and are the unintentional wavelengths produced by things like, computers, appliances, cell phones and electrical wiring. EMF/ELF has increased steadily over the past 50-100 years as our daily use of electronic and labor saving devices has skyrocketed. This has become a real public health concern.

EMF/ELF Extra Shielded Wiring = Electromagnetic Safety

True Wave™ infrared heaters are the most effective and safest infrared heaters available. We have developed our own patented technologies that cancel out both EMF (Electromagnetic Fields) and ELF (Extremely Low Frequencies). We guarantee that you will not experience any harmful wavelengths when you are in your sauna. EMF levels tested consistently show an average of less than 1mg and our ELF levels test 3-5 times below the threshold of concern set by the World Health Organization (WHO). Many of our competitors' saunas tested with levels 20 times or more above this same threshold of concern. Our proprietary True Wave™ heaters were the first low EMF carbon-based heaters in the market and revolutionised the entire infrared sauna industry.

Patented Technology Keeps Our Saunas Safe

We manufacture our saunas with advanced heater systems to keep you and your family safe. We go to extra lengths such as shielding our heater wiring in metal conduit and twisting the wires inside the conduit to reduce the EMF levels even further. Lastly, we shield all electrical components to help block the EMF/ELF and ground the heater to further eliminate any stray electrical wavelengths at their source.

Low EMF (Electromagnetic Field)

[View EMF certificate](#)

Our exclusive manufacturing process and patented far infrared heater technologies reduces EMF levels to virtually zero where you are sitting ensuring the highest level of safety. This has been confirmed by third party testing. When EMF levels are measured in the seating area inside a Jacuzzi® infrared sauna, EMF levels are virtually undetectable. Measurements have been verified by VitaTech Electromagnetics.

Low ELF (Extremely Low Frequency)

Extremely low frequency (ELF) is easily detected standing near any utility power line. You can also be exposed when operating electrical appliances. When testing our low ELF technology, our saunas measured at 200 mV – five times below the threshold of concern, as opposed to many competitor models, where ELF levels were found to exceed 20,000 mV – 20 times above the threshold of concern. When we test our saunas without an actual person inside, our ELF metrics are equally impressive. The Threshold of Concern is 10 Volts/Meter (V/m). Jacuzzi® Infrared Saunas averaged 3.4 V/m, whereas our competitors saunas measured 300+ V/m.

Clearlight Heater Test: Emissivity and Absorption

Emissivity: the measure of an object's ability to emit infrared energy.

Emissivity Test Results:

* **Please note:** Emissivity is only one measure of a heater's effectiveness. To get positive results, we must also determine the ability of the infrared energy to travel through the air and then be absorbed by the body. This is the true measure of the heater's effectiveness.

Energy Absorption: The measure of infrared penetration and retention in the human body. Clinical studies show that the addition of our proprietary ceramic powder in our True Wave II heaters substantially increases emissivity, waveform stability and heat absorption (see pictures below).

Absorption Test results: I & I EPOS 2011

True Wave II Carbon/Ceramic
99% Absorption

Plain Ceramic Heater
67% Absorption

Plain Carbon Heater
73% Absorption

Infrared Saunas Safety Certifications and Testing

All Jacuzzi® brand saunas are rigorously tested and certified for product safety. Your health is our number one concern.

Electrical and Hazardous Materials Safety

SAA Approvals is accredited by the Joint Accreditation Service of Australia and New Zealand (JAS-ANZ) as a third party certification body to issue of Certificates of Approval for declared and non-declared electrical equipment that has proven to comply with the safety requirements of the applicable Australian and New Zealand Standard.

SAA - Australia NZ electrical certification
[View certificate](#)

The ETL service mark is verified and certified by Intertek, a third-party safety rating company. This mark assures the highest level of safety and compliance for all components and saunas.

ETL certification
[View certificate](#)

Compliance with the CE standard implementation starts during the design and manufacturing process relies on the manufacturers themselves both in Australia and New Zealand.

CE
[View certificate](#)

Our compliance with RoHS, (Restriction of Hazardous Substances) is verified by RoHS standards and certified by Intertek.

RoHS

VOC's

We have designed and built our saunas to be free of any harmful VOCs (Volatile Organic Compounds.) To verify this, we regularly utilise third party labs to perform rigorous VOC testing. Air samples are first tested in a clean room. The sauna is then set up and a second round of samples are taken. Next the sauna is programmed to heat up and run at maximum temperature for over two hours at which time another series of air samples are taken inside and outside of the sauna. All results are then compiled, compared and recorded. This way we know that no VOCs will be present during your sauna session.

VOC's
